TECHSTREET SUBSCRIPTIONS
GLOBAL STANDARDS ACCESS MADE EASY

THE CHALLENGE

Industry standards are vital tools for successful companies. Efficient access leads to faster and better decision-making, reduced time to market, and improved quality and safety. But providing company-wide access to the latest industry standards can be difficult and expensive.

THE SOLUTION

Techstreet Subscriptions provides immediate online access to the exact standards an employee needs to complete their job. Users view full-text PDF files from any location worldwide—office, home, in the field—anywhere they have an Internet connection. Documents are updated automatically so you'll always have the most current and correct information.

INDUSTRY COLLECTIONS OR BUILD-YOUR-OWN

Get precise content for all your users by choosing full sets, subject sets or individual documents to create a custom standards collection for your organization. View a list of available publishers here.

SERVE MULTIPLE USERS WORLDWIDE

Choose the approximate number of users who require access and the number of different locations. Users get online access 24 hours a day, from any location you choose.

AVAILABLE STANDARDS

Our publishing partners include over 75 of the world's leading standards developing organizations: AAMI, ACI, AGA, ANSI, API, ASCE, ASME, ASTM, AWWA, BSI, CSA, DIN, HI, IEC, IEEE, ISO, MIL, NSF, and many more.

GE Lighting	Veolia Services
GE Sensing	WalMart Stores
Georgia Power	Worley Parsons Group

INDUSTRIAL SERVICE COMPANY FINDS CONVENIENCE AND COST SAVINGS WITH ONLINE STANDARDS SOLUTION

"We researched subscription services and chose Techstreet for cost, convenience of web-based application, and being able to choose our own content. Other providers only sell packages that they want to place on our server, forcing us to keep up with changing content. We don't have time for that. Also, we save money by not having to purchase duplicate copies for different regional offices. And our field inspectors and project managers get the convenience of immediate access without having to carry a library on the plane with them. Best of all, we can rest easy knowing that our standards are always current, without having to spend the time researching and updating them."
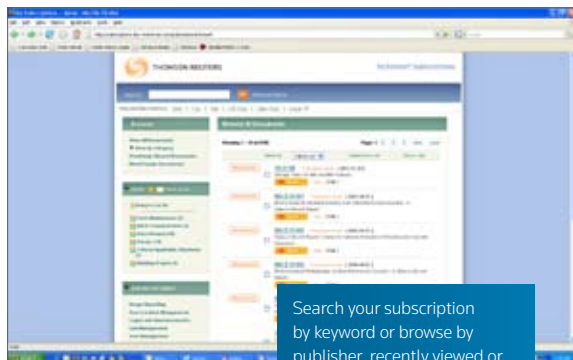

-Susan James

GLOBAL STANDARDS ACCESS MADE EASY

Improved access to standards helps improve quality and safety and speeds product time to market. This managed information solution brings additional value to your organization by:

- Increasing productivity and improving workflows

- Reducing search time

- Eliminating redundant purchasing and maverick spending.

HOW IT WORKS

- Select full sets, subject sets or individual documents to create a custom standards collection for your organization

- Get company-wide Internet access to full-text standards in PDF format

- Simultaneous log-in via any web browser at subscriptions.techstreet

- Guaranteed automatic updates for the length of your subscription

- Web 2.0 environment designed for novice and advanced users

- Administration features include real-time usage reports, announcement board and other management tools

- Add documents and users at any time

- 12-month subscription or longer

- Easy to use, no training required

Search your subscription by keyword or browse by publisher, recently viewed or most popular. Click the title for a document description or click the READ button to view the full document. Right-click to save documents to your desktop for offline viewing.

Users and administrators can create custom lists of documents for departments or projects, and receive automatic email notification when documents are revised. Lists can be public or private, and list members and contents can be changed at any time.

A complete set of administrative tools makes it easy to invite users and communicate with them, track usage, manage seats and customize with your own company logo.

Techstreet Subscriptions uses Web 2.0 technologies to speed delivery of industry codes and standards to everyone in your organization,—regardless of where they work. This managed information solution brings value to your organization by reducing search time and improving workflows, increasing quality and safety and eliminating redundant purchasing.

FEATURE	BENEFIT
Web-based delivery of industry codes and standards	Provides a single set of controlled documents to multiple users; 24/7 access from any worldwide location
Full-text electronic PDF files	Documents are easily searchable and readable using Adobe Reader
Custom content	Don't over-pay for large packages or documents you don't need
Automatic updates	Save time with continuous and immediate access to the most current standards available; guarantee compliance for ISO registration and state/federal regulations; protects against general liability
Email notification when automatic updates occur	Reduce inaccuracies and re-work with the knowledge that a new version is available; stay competitive in an ever-changing business environment
Web 2.0 interface	All information displays in a single, easy-to-navigate user interface; fast search and document rendering
Document relationship links	Immediately links users to replaced, withdrawn or amended documents, plus links to referenced documents if applicable
Advanced browse features	Accommodates both new and experienced users
Multiple custom lists	Create custom lists of documents by project or department; easy to access and share among team members
Download, save, copy and print	Document flexibility
Offline viewing	Easy access in the field or while traveling

FOR ADMINISTRATORS	
Concurrent user access	Company-wide access by IP address, by referring URL, or by user name and password; simple to set up and maintain
Comprehensive usage reports	Get COUNTER-compliant reports any time you need them; view usage by users, document downloads, turn-aways, search logs, and print requests
User management tools	Add or invite users 3 different ways: individually by email address, as a large group via .csv upload, or seamless link from your company Intranet
Company branding and communication	Add your company logo for a customized look; use the Announcement communication Board for usage tips and your own official communications
Custom list management	Create and manage custom lists by department or project; notify users via email or on the Announcement Board
