

Techstreet Enterprise

Customer Document Repository

Use Techstreet's Document Repository to upload or link to standards-related documents and share them with your users.

About the Customer Document Repository

The Techstreet Enterprise Document Repository gives you the ability to upload internal standards, gap analyses, and other standards-related documents directly into your subscription. From there, your users will be able to access this content, add it to lists, browse it and more.

Features

- Create document records that act just like other standards
- Associate multiple files and links with one document
- Track usage in Usage Reporting module
- Make your documents available to all your users
- Connect your documents to standards in your subscription
- Use Historical Versions feature to track archival versions of documents

The screenshot shows a web interface for the Document Repository. On the left is a dark sidebar with navigation items: Administration, Overview, Orders (with a red notification icon), Building Blocks, Purchasing, Document Repository (highlighted in blue), User Administration, Manage Lists, and Usage Reporting. The main content area has a title 'Document Repository' and a subtitle 'Use the Document Repository to upload or link to standards related documents in your Techstreet Enterprise subscription. Documents will be available to all users in your subscription.' Below this is a 'Dashboard Summary' section with two gauges: 'Free Space' showing 500 MB and 'Used Space' showing 0 MB. Underneath are 'Current Usage Statistics' showing 0 Documents, 0 Files, and 0 Resources, along with a 'Browse My Documents' button.

Finding uploaded documents

Once you've added a document, it's easy for users to discover it in your Techstreet Enterprise subscription. First, much of the metadata you enter gets indexed by our search engine, so it's easy to find your documents doing a search. In addition, Document Titles get added to our type-ahead tool. So as your users start to type the title of a document you have added, our search engine type-ahead tool will suggest the title to the user.

Users can also use the Browse tool to find documents you have added to your Techstreet Enterprise subscription. Document Repository is listed along with other publishers available in your Browse tree. Clicking on Document Repository will load a list of all the documents you have added, and users can refine results using Tags if you have chosen to employ them.

Who we are

Clarivate Analytics accelerates the pace of innovation by providing trusted insights and analytics to customers around the world, enabling them to discover, protect and commercialize new ideas faster. We own and operate a collection of leading subscription-based services focused on scientific and academic research, patent analytics and regulatory standards, pharmaceutical and biotech intelligence, trademark protection, domain brand protection and intellectual property management. *Clarivate Analytics* is now an independent company with over 4,000 employees, operating in more than 100 countries and owns well-known brands that include *Web of Science*, *Cortellis*, *Derwent*, *CompuMark*, *MarkMonitor* and *Techstreet*, among others.
