

Congratulations, your machine is correctly configured to view secure PDFs.

NOTE – If you are using Chrome or Edge as your browser:

These web browsers have a built-in reader that will interfere with FileOpen. On the DOWNLOAD button, right click, choose "save link as" or "save target as" – save the document to your desktop, documents or downloads (it cannot be saved on a shared drive and do not change the file name). Once saved, open the document directly from your computer using Adobe.

For assistance opening your secured PDF, please call:

+1 855 999 9870 (United States and Canada)
